

Step 1: Create React Project

Create a new React project:

```
npm create vite@latest digital-logbook -- --template react
cd digital-logbook
npm install
npm run dev
```

Step 2: Create Student Details Form

Add 5 fields:

1. Student Name
2. Roll Number
3. Email
4. Course/Branch
5. Semester

Example:

```
Student Name: [  ]
Roll Number:  [  ]
Email:        [  ]
Branch:       [  ]
Semester:     [  ]

[ Save ]
```

Step 3: Create State

Use React `useState()` to store the form data and student records.

```
const [student, setStudent] = useState({
  name: "",
  rollNo: "",
  email: "",
  branch: "",
  semester: ""
});

const [students, setStudents] = useState([]);
```

Step 4: Handle Input

Create one function to update the form fields.

```
const handleChange = (e) => {
  setStudent({
    ...student,
    [e.target.name]: e.target.value
  });
};
```

Step 5: Save Student

When the user clicks **Save**, add the student to the list.

```
const handleSave = () => {
  setStudents([
    ...students,
    { id: Date.now(), ...student }
  ]);
};
```

Step 6: Display Student Records

Show saved students in a table:

Name	Roll No.	Email	Branch	Semester	Action
Rahul	101	rahul@gmail.com	CSE	5	Edit Delete

Use `.map()` to display the records.

Step 7: Edit Student

Add an **Edit** button.

When clicked, load the selected student's information back into the form.

```
const handleEdit = (id) => {
  const selected = students.find((item) => item.id === id);
  setStudent(selected);
};
```

You can then update the selected record when the user saves the changes.

Step 8: Delete Student

Add a **Delete** button.

```
const handleDelete = (id) => {
  setStudents(
    students.filter((item) => item.id !== id)
  );
};
```

The selected student will be removed from the table.

Step 9: Final Index Page

Your final page should look approximately like:

```
DIGITAL LOGBOOK
Student Details

Student Name  [ _____ ]
Roll Number  [ _____ ]
Email        [ _____ ]
Branch       [ _____ ]
Semester     [ _____ ]

[  SAVE  ]

-----
Name      Roll No.   Email      Branch     Sem   Actions
-----
Rahul     101         ...        CSE        5     Edit Delete
Amit      102         ...        ECE        5     Edit Delete
-----
```
